In this task you will take a CSV data sources and ETL them into an OLAP design.  This is a team project and as such you only need to submit 1 version of the In Class assignment.  Please note the deliverables below and the questions your OLAP must be able to answer.

**Deliverables:**

1. A word document containing the over ETL design.  This can be done in draw.io or another graphical program and the image pasted into the document.  Please include:
   1. Logical Flow Design (Job)
   2. Data Flow Design (Transformations)
2. A .zip file containing your pentaho files
   1. Please parameterize your connection string information.  Failure to do so will result in 10% off the grade.

**NOTES/HINTS**

1. This is a team assignment.  As such, I only need 1 submission by the team.
2. The OLAP design has been provided.
   1. The TimeDim has already been loaded.
